

# Proper Casework Can Promote Infection Control

Healthcare environments require surfaces and components that can be easily cleaned, have few seams, and withstand harsh disinfection practices. Neocase casework by Groupe Lacasse is designed specifically for the healthcare environment and promotes proper infection control.

<b>Casework That Adapts To The Room</b>	Inset modular rail system allows casework to mount flush to wall, eliminating gaps that cannot be sealed.
<b>Room To Clean</b>	Wall mounting of base cabinetry permits easy access for floor cleaning.
<b>Minimize Facility Disruption</b>	Installation is simple and does not damage existing walls and surfaces. Cabinet hanging system dispenses with wall blocking. Reconfigures with minimal disruption.
<b>Fully Sealed Edges</b>	Neocase fully sealed edges resist internal contamination. All exposed edges are sealed, including cabinet bottoms, sub-tops, and backs.
<b>End Delamination</b>	Permanent edging will not chip or break. Laser edgebanding (2019) eliminates contamination of edge seams.
<b>Manage Water Flow</b>	Solid surface with integrated sinks and backsplashes help contain water splashing. Offset drains aid in infection control and vertically mounted faucets aid in cleaning.
<b>Suitable For Harsh Chemicals</b>	Neocase casework is tested for compliance with BIFMA HCF 8.1 and will withstand rigorous healthcare cleaning regimens.
<b>Long Lasting Solutions</b>	Our 25-year warranty ensures many years of durable performance.
<b>Manage Medical Devices</b>	Modular medical rail system permits interchange of devices such as dispensers without building or wall damage.

Groupe Lacasse has the experience, expertise and capability to deliver incomparable design, exceptional quality, optimum service and outstanding value.
